Ram:  16 gigabytes

Hard Drive: 250 gigabytes

**Web Server Requirements Low-Medium Users**

CPU: 8 core ~3Ghz

Operating system: Microsoft server version currently supported by Microsoft

Ram: 8 gigabytes

Hard drive: 250 gigabytes

**Web Server Requirements High-Very High Users**

CPU: 2 X server grade Intel Xeon ~3 Ghz or equivalent

Operating system: Microsoft server version currently supported by Microsoft

Ram: 64 gigabytes

Hard drive: 250 gigabytes

***Special Circumstances***:

In networks where there is not a Microsoft Windows server, a Windows 10 operating system should suffice in most situations where a network server is not in play.

Other operating systems are not supported at this time.

Intel NAS drives are not supported at this time.
